AWARENESS ABOUT HYGIENE

1. Introduction

The social activity titled “**Awareness about hygiene**” is carried out at Government Higher Primary School on 14th March 2023. The target audiences are the students of class 5th and 6th. The main aim of choosing this topic is to create awareness among the students about the hygiene practice through which they maintain or promote good health, preventing the spread of infectious diseases.

2. Content

To ensure personal hygiene you need to maintain cleanliness. Cleanliness is important in order to stay healthy and away from diseases. Students learn general hygiene at home itself but once they start staying in a hostel, cleanliness becomes mandatory to follow. Amidst numerous other students and their habits, it is too difficult to adapt oneself and maintain personal as well as public hygiene at all times.

Personal hygiene is how you care for your body. This practice includes bathing, washing your hands, brushing your teeth, and more. Every day, you come into contact with millions of outside germs and viruses. They can linger on your body, and in some cases, they may make you sick. Hygiene generally refers to the set of practices associated with the preservation of health and healthy living. The focus is mainly on personal hygiene that looks at cleanliness of the hair, body, hands, fingers, feet and clothing, and menstrual hygiene. Improvements in personal knowledge, skill and practice that modify an individual's behaviour towards healthy practice are the focus of hygiene promotion.

Sanitation means the prevention of human contact with wastes, for hygienic purposes. It also means promoting health through the prevention of human contact with the hazards associated with the lack of healthy food, clean water and healthful housing, the control of vectors (living organisms that transmit diseases).

3. Conclusion

The social activity conducted on “Awareness about hygiene” for 5th and 6th standard students of Government Higher Primary School, Ampar them to gain more knowledge about personal hygiene. The session was interactive and received the good feedback from the students and school.

4. Learnings of Social Activity

The social activity gave an opportunity to share thoughts about personal hygiene of keeping all parts of the external body clean and healthy. This helped increase self confidence to speak with a group of students and also improved the communication skills, presentation skills, the way of answering the questions.

5. Feedback

The session feedback from the students is collected. The responses received conclude that the attendees are satisfied with the session. The feedback collected from students (Fig. 5.1) and acknowledge letter (Fig. 5.2) from the school are given below.
